

# Asian Dialogues for Greener Production - Physical Conference

17 August 2022 | Siem Reap, Cambodia | Online participation possible

**GMAC and GIZ FABRIC** warmly invite you to attend our first post lockdown, physical Asian Dialogues conference!

This year's conference theme "**Asian Dialogues for Greener Production**" is focused on identifying and discussing environmental aspects of production in the textile and garment industry. With major challenges ahead, this conference aims to connect the change makers and innovators in order to foster cleaner production and sustainability in the industry.

A number of workshops and panels will allow for great interactions between participants and speakers. International and regional sustainability experts and practitioners will provide rare insights into the industry. For physical attendance, you will also have the opportunity to meet fellow colleagues from brands, manufacturers and development partners at **Sofitel Siem Reap** close to the world heritage site of Angkor Wat.

All apparel, garment and footwear industry professionals as well as everyone interested in sustainable textile supply chains, corporate social responsibility and environmental sustainability are encouraged and welcome to participate. Please note that only physical participation will allow for participation in the afternoon networking event. A more detailed agenda will be sent to all registered participants.

The event will be free of charge, for physical participants more information on location and accommodation options will be provided after registration. **Register before the 1<sup>st</sup> of August to save yourselves a seat in Siem Reap!**

## Workshops

### Morning Session

#### 1a Powering Production with Solar

An expert panel will look into regional solar roadmaps and the changing landscape of brand emission requirements as well as the challenges and solutions of powering production with solar.

#### 1b New approaches to financing greener production

This panel will showcase a few financing examples to promote the shift away from energy sources such as coal to renewables, while balancing environmental impact and economic feasibility

### Afternoon Session

## 2a Preconsumer textile waste - recycling in production countries

Contributing to the ongoing conversation around recycling in this workshop, you will hear from participants involved in proof-of-concept projects seeking to determine the best ways to approach recycling in a range of Asian production countries.

## 2b The value of environmental data

Data can tell a lot about performance, but also about environmental impact. For many brands, retailers and producers, the collection of data still remains a confusing task, exacerbating the belief that data collected is often too vague rather than collecting and tracking impact.
